Medtronic to Unveil Additional Clinical Data on HVAD® System at ISHLT 2018

April 9, 2018 3:00 PM CT

Medtronic plc

Data on Implant Approach, Blood Pressure Management, Length of Stay, and Quality of Life to be Featured During Congress.

DUBLIN - April 9, 2018 - Medtronic plc (NYSE: MDT) today announced a preview of notable clinical data on the HeartWare HVAD® System that will be presented at The International Society of Heart and Lung Transplantation (ISHLT) Scientific Sessions, from April 11-14, 2018, in Nice, France. The HVAD System is a mechanical heart pump (also called a left ventricular assist device, or LVAD) that helps increase the amount of blood that flows through the body in patients with advanced heart failure.

"ISHLT is the pre-eminent gathering of clinicians involved in caring for patients with advanced heart or lung disease, including heart transplants and mechanical circulatory support. Medtronic is pleased to collaborate with physicians to share the latest clinical evidence that advances MCS therapy," said Mike Hess, general manager of the Mechanical Circulatory Support business, part of the Cardiac and Vascular Group at Medtronic.

The congress agenda highlights several presentations featuring the HVAD System (all times CEST):

Wednesday, April 11

- 8:30-10 a.m., Apollon: Blood Pressure Management Ameliorates the Severity of Neurological Events, JJ Teuteberg, Stanford University

Thursday, April 12

- 6:15-7:15 p.m., Uranie/Calliope: An Analysis of Preceding Signals and Treatment Strategies of VAD Thrombus in the ENDURANCE and ENDURANCE SUPPLEMENTAL Trials, FD Pagani, University of Michigan

Friday, April 13

- 6:15-7:15 p.m., Hermes: Infections and Subsequent Events in the ENDURANCE and ENDURANCE Supplemental Trials, RL Kormos, University of Pittsburgh

Saturday, April 14

- 1:15 p.m., Athena: The Effects of Concomitant Procedures at the Time of LVAD Implant for Patients in the ENDURANCE and ENDURANCE Supplemental Trials, NA Mokadam, University of Washington

Featured posters include:
Adverse Events and their Effect on Quality of Life and Functional Capacity in the ENDURANCE and ENDURANCE Supplemental Trials

Does Increasing Experience in Implementing the Blood Pressure Management Protocol in the ENDURANCE Supplemental Trial Result in Better Outcomes?

Change in Heart Rate from Pre-Implant to Discharge in Destination Therapy is Associated with Mortality and Admissions in LVAD Patients - A Substudy of the ENDURANCE trial

Details such as times, presenters and locations are subject to change.
